PROFESSIONAL SUMMARY

Committed Software Developer with 2+ years of experience in full-stack web development, specializing in React and TypeScript. Actively expanding expertise in AI engineering. Technical projects showcased on GitHub include high-performance web modules. Dedicated to engineering excellence through clean code, modular design, and robust API integration.

TECHNICAL SKILLS

- Frontend:** React, TypeScript, JavaScript, Angular, Vue.js, HTML5, CSS.
- Backend & DB:** Java (Spring Boot), Python (Django), Node.js, RESTful APIs, SQL Server, Oracle, MySQL.
- Tools & Dev:** Git, Jenkins, Agile/Scrum, Jira, Selenium (Automation), UI/UX Design.
- Communication:** Trilingual (English, Cantonese, Mandarin) with experience in drafting technical documentation and member-facing communications.

PROFESSIONAL EXPERIENCE

Programmer (Web Developer) – InfoTech Services (Hong Kong) Limited, Hong Kong, China Apr 2022 – Jan 2023

Full-Stack Development (Housing Authority Project):

- Implemented a robust reporting platform for the Hong Kong Housing Authority using Angular, enabling efficient property damage and repair claim reporting through modular, reusable components.
- Engineered RESTful APIs to integrate an Oracle database with a Spring Boot backend, significantly reducing data retrieval latency and improving system scalability.
- Optimized 10+ core features within the government property system using TypeScript, enhancing responsiveness and long-term system stability.

Data Visualization (Hospital Authority Project):

- Developed an interactive patient chart display module using React and Chart.js, enabling healthcare professionals to analyze clinical trends and patient progress effectively.
- Strengthened deployment reliability by implementing SQL rollback queues into the automated system, increasing development resilience.

Junior Programmer (Web Developer) – Taylor Coulter, Hong Kong, China Feb 2021 – Mar 2022

- Transformed 50+ complex paper-based forms into interactive online formats for the Social Welfare Department using Vue.js and JSON Schema validation.
- Achieved an 80% reduction in manual calculation and validation time by implementing automated QA processes with Selenium WebDriver.
- Optimized storage and retrieval of form submissions using Spring Boot, ensuring data integrity for large-scale NGO administrative processes.

EDUCATION & CERTIFICATIONS

Meta Front-End Developer Professional Certificate, Coursera 2024

Bachelor of Sciences, Computing Science, Simon Fraser University, Burnaby, BC 2020

ADDITIONAL EXPERIENCE

Barista (Customer Service) – Bubble World Tea House, Burnaby, BC Jun 2023 - Present

- Provide attentive, personalized service to diverse local customers, handling high-volume interactions with tact and professionalism.
